

Instructions for Installing a SAFER Systems Software License

At the end of the software installation process, the SAFER Software License Activation page will be displayed to prompt you to activate your software license.

You can submit your license request now...

...or exit and do it later:

Please read entire page before proceeding.

This step is required to activate your software license. The software must be licensed prior to operation and you will need to contact SAFER Systems to obtain the license. You can use the following methods to get a license:

Best method: Go to the SAFER WEB site at www.safersystem.com. Click on the license icon that will take you directly to the license request form.

Or you can:

- Submit a license request by FAX 805-383-6344, Contact SAFER directly by phone 805-383-9711, or E- mail techsupport@safersystem.com

The licensing process can be completed at any time, so selecting EXIT will allow the installation to complete without the licensing step. You can find the license entry program by selecting START, Programs and then locate the SAFER program group. The program is called "Software License".

If you were issued a Security Device (dongle), you will need to install the device before attempting to license the program.

Please complete these steps:

1. Please submit following LOCK CODE to SAFER in order to generate your license. Write this down and use one of the four previous methods described above to submit your LOCK CODE. The web page process is self-explanatory. If you fax, phone or email your LOCK CODE to SAFER, be sure to include your name, company, phone number, FAX number, and email.
2. We will process your request quickly and return the corresponding LICENSE FILE to you.
3. Once you have a file, please use Browse button to locate this file. When file is selected your software license will be activated.

LOCK CODE

LICENSE FILE

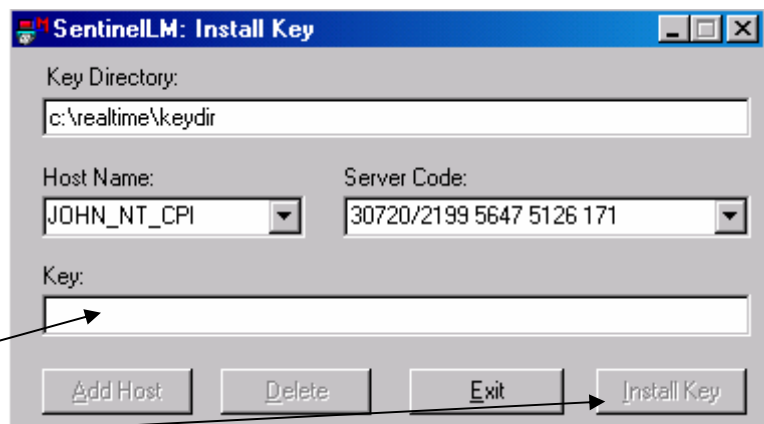

To request your License File, submit the Lock Code generated here.

When you receive the License File from SAFER, save it on your Desktop. Then browse and select it in the field as indicated.

Click Exit.

After your software is confirmed to be working, you may delete the license file from your desktop.

NOTE: With SAFER software 9.3 or older versions, the License Key window is different. You should submit your Server Code, which is a longer string of digits. You will receive a numeric Key Code from SAFER Systems, which will be entered in the Key field.

Key Directory:

Host Name: Server Code:

Key:

Then click the Install Key.
