

**SAFER Systems Selects Safety Technologies as its Mexico Representative**

***Monterrey-based company will sell SAFER Systems products to regional companies and government agencies***

Camarillo, CA – SAFER Systems, the global technology leader in chemical emergency management solutions, has named Safety Technologies as its Mexico sales agent. Based in Monterrey, Safety Technologies will market SAFER Systems' products and services to refining and chemical facilities, other companies that work with chemicals and government agencies responsible for emergency response and/or environmental protection. SAFER's expansion into the Mexican market is part of its strategy of providing emergency management solutions to countries and regions with growing industrial and energy sectors.

Safety Technologies is an industrial safety consultancy serving diverse industries throughout Mexico and Latin America including chemicals/hazardous materials, oil and gas, mining, construction, and manufacturing.

"Safety Technologies fits well into SAFER's plans for the Mexican market. They are well established in key market segments and bring a depth of services from emergency planning to safety engineers on permanent assignment to IT services," said SAFER Regional Business Manager, Jim Gremillion.

Hector Hugo Ojeda, General Manager of Safety Technologies, adds "The purpose of the alliance between our two companies is to create safer working and community environments. We consider SAFER Systems' chemical emergency management products to be high technology and the right technology for Mexico's industrial and public sectors. Together, our two companies will promote the philosophy of safety first and our shared beliefs that protecting human life is paramount."

SAFER's Global VP of Sales, Mike Teague, states, "For almost three decades, our chemical emergency response solutions have been making it easier to safeguard human life and to respond more cost effectively to chemical incidents. As we continue our global expansion, we're excited to offer our solutions to relevant industries and organizations in Mexico. Safety Technologies is the type of company we like to partner with. They bring a local perspective and strong technical competencies to those in need of our solutions. We look forward to a mutually beneficial business relationship."

### **About SAFER Systems**

Founded in 1978, SAFER Systems is the global technology leader in chemical emergency management solutions. The company's state-of-the-art solutions, incorporating patented technologies, are designed to detect and accurately predict in real-time the dispersion of accidental or intentional releases of toxic chemicals. Companies worldwide that manufacture, process, store or transport hazardous materials plus an array of government emergency management and environmental protection agencies, can now better prepare for and quickly determine the best ways to respond to an actual chemical emergency. SAFER Systems' customers include many Fortune 500 chemical and oil companies, Class 1 railroads in North America, private and public sector HazMat/First Responder teams and more. SAFER Systems is headquartered in Camarillo, California, and maintains offices worldwide. For more information, visit [www.safersystem.com](http://www.safersystem.com).
