**SAFER Systems to Offer Chemical Emergency Management Solutions
In Additional South America Markets via The Appointment of Agents
in Venezuela and Trinidad and Tobago**

CAMARILLO, CA--(March 31, 2010) - SAFER Systems, the global technology leader in chemical emergency management solutions, has named Sistemas G Controls, C.A. as its Venezuela sales agent and Analyser Services Trinidad Ltd. as its sales agent in Trinidad and Tobago . These two organizations, based in Caracas and Couva respectively, will market SAFER Systems' products and services to a variety of industrial concerns, particularly those involved in refining. SAFER's expansion in South America is part of its strategy to provide emergency management solutions to countries and regions worldwide that have significant industrial and energy infrastructures.

Sistemas G Controls, C.A represents technology-based companies whose products and services support the gas and petroleum industries.

Analyser Services Trinidad Ltd., a subsidiary of Norsk Analyse AS, specializes in the design engineering and building of complete analyser houses and systems for the process industry.

"Both of these companies have long histories in their respective markets that provide SAFER Systems quick access to customers and opportunities," said Jim Gremillion, SAFER Systems' Regional Business Manager for South America.

SAFER Systems' Global VP of Sales Mike Teague added, "For almost three decades, our chemical emergency response solutions have been making it easier to safeguard human life and to respond more cost effectively to chemical incidents. As we continue our global expansion, we're excited to offer our solutions to relevant industries and organizations in key new markets in South America. Sistemas G Controls, C.A and Analyser Services Trinidad Ltd. are the types of companies we like to partner with. They bring a local perspective and strong technical competencies to those in need of our solutions. We look forward to a mutually beneficial business relationship with both of these companies."

About SAFER Systems

Founded in 1981, SAFER Systems is the global technology leader in chemical emergency management solutions. The company's state-of-the-art solutions, incorporating patented technologies, are designed to detect and accurately predict in real-time the dispersion of accidental or intentional releases of toxic chemicals. Companies worldwide that manufacture,

process, store or transport hazardous materials plus an array of government emergency management and environmental agencies, can now better prepare for and quickly determine the best ways to respond to an actual chemical emergency. SAFER Systems' customers include many Fortune Global 500 chemical and oil companies, railroads, private and public sector HazMat/First Responder teams and more. SAFER Systems is headquartered in Camarillo, California, and maintains offices worldwide. For more information, visit www.safersystemv10.com.
