**SAFER Systems Announces the 25<sup>th</sup> Anniversary  
Of SAFER Real-Time®**

**Camarillo, Calif. – March 15, 2006** – This year, **SAFER Real-Time®** celebrates 25 years of serving the emergency response community! The flagship software of SAFER Systems, it is unequalled in the marketplace for real-time plume dispersion modeling, plume measurement, and chemical emergency response management. It has been the frontrunner in the industry for innovative modeling technology and was awarded a patent for its Advanced Back Calculation algorithm-based module.

To mark the **Silver Anniversary** of **SAFER Real-Time®**, SAFER Systems is pleased to announce the **Silver Plume Package**, offering discounts on new purchases or renewals of software support licenses.

Also planned for 2006 is the release of **SAFER Real-Time®** version 9.3, which is packed with new features like the jet model for dispersion of gases released from a relief valve or any container under pressure; a particulate model that handles dispersion of particulates with deposition and decay; the ability to draw hot/cold zones, place icons (e.g., ambulance, fire truck, police), and add text to the GIS map; the capability to import scenarios developed in TRACE® into Real-Time®; and the capacity to dynamically change isopleth limits. The software release is planned for early spring.

Customers are encouraged to share in the success of **SAFER Real-Time®** software's 25 years of supplying emergency responders with hazardous chemical release management solutions. The **Silver Plume Package** offers a savings on **SAFER Real-Time®** software support licenses from February 10 through June 30, 2006.

"This is a great opportunity for customers to save now on support licenses they know are coming due for renewal anytime this year," says Mike Teague, SAFER Systems Manager, Sales & Marketing, "and new customers can enjoy anniversary savings on software packages!"

For more information on **SAFER Real-Time®** and the **Silver Plume Package**, contact the company at 805-383-9711, email to [sales@safersystem.com](mailto:sales@safersystem.com), or visit their website at [www.safersystem.com](http://www.safersystem.com).
